INTRO

Quad bikes are fun to ride and they go places where other forms of transport often cannot go easily. You can combine quad bike riding with many other activities or use it as an activity on its own and still have a huge amount of fun.

What we offer is combining a quad bike ride with a game watching safari and we offer this at a World Heritage Site; The Cradle of Humankind. The great thing is that you can be out of the city and on the private game farm within 45 minutes and forget that the city exists as you take a leisurely quad bike safari across the open savannah grasslands. You drive your quad bike at a leisurely pace as you move across the land where roughly 700 head of game wander; truly a memorable experience.
