## INTRO

Shark cage diving in Durban offers you the unique opportunity to experience the thrill of a soft cage dive as no Great White sharks are present in the warmer waters off the Durban coast.

### **Durban Shark Diving Experience Gift Vouchers are Available.**

Durban shark cage diving offers you an up-close and personal encounter with these animals and for many it also gives new insight to these feared predators. It allows you to see them in their natural habitat, as graceful, calm and often peaceful creatures.

We are offering you the chance to experience shark cage diving in the Durban without having to be a PADI certified diver.

Soft cage diving differs from the traditional shark cage diving in heavy metal cages in that the soft cage is more like a "netted pen" from which you can safely observe the sharks in their natural habitat. Heavy metal cages are used in the cold waters of the Cape because Great White Sharks are present which hunt large, mammalian prey, namely seals. The sharks found in the warmer waters around KwaZulu-Natal are smaller and live on a diet of smaller schooling fish. There are no Great White Sharks present in these warm waters, making it safe to use a soft cage.

Soft cage shark cage diving in Durban is less intrusive to your viewing of the sharks, bringing you closer to them and they to you. It truly is a one-of-a-kind experience that can only be found off the KwaZulu-Natal coast.
